Spill cause is assumed to be roots and grease, but given that Fullerton's CCTV truck is currently out of operation (repairs) Spill was caused by a combination of rags and rocks that lentered the pipe up stream of the blockage where an outside ut The roots in the District line restricted flow in the pipe. When the resident began to pump out his swimming pool into the s Pipe structural problem/failure. The contractor performing construction of the new lift station exposed the force main in o District crews cleared a grease and root blockage. However, crews also removed a piece of rebar along with rags and otl This was the second spill in this section in two days. The night before a FOG blockage was cleared just upstream of this District crews video inspected the line and found heavy grease buildup. Crews hydrojetted the line to remove the grease Root intrusion and general debri blockage REBAR FOUND IN PIPELINE AND A SMALL SAG IN ABOUT 100 FT OF LINE Rebar found in pipeline and a small sag in about 100 feet of line. Estimated cause due to root intrusion. Video of line will be taken later today to identify cause. City crew pulled grease back with cleaning. The City's Eight-inch sewer main line had a grease blockage next to the lateral connection of the Huntington Terrace Sen Debris (rags) and grease led to the blockage. The cast iron sewer pipe was corroded and in poor condition. Corrision was internal. The blockage was caused by soap scum and debris in the line Redos Contraction Company was installing a new sewer trunk line for Orange County Sanitation District. A new ring for a When the building was constructed, the sewer was plumbed into a septic tank that was later abandoned. During the abar Sticks dropped into manhole through pick hole.

Upon arriving, crews contained the spill, cleared the blockage, and flushed/captured all sewage from the nearby storm dra Upon arrival, operators cleared the blockage, washed down the contaminated area, while capturing all water used for clear The CCTV inspection revealed a sag and cracks in the District line. This pipe segment was part of our sewer system reha This line is part of the sewer system rehabilitation program, phase 1, and is scheduled to be repaired. Due to grease in the The spill information will be given to the Garden Grove Environmental Management Team for their review. They will enfo On Monday 2/11/08 District crews video inspected the pipe with the District CCTV equipment. Roots and grease were fou District crews will hydro jet the line again on 5/29/2008 and then video inspect the pipe using the District CCTV equipmen District crews hydrojetted all lines in this portion of the system to ensure they were as clean as possible. The spill informa District crews ran a root cutter in the line to ensure that the pipe was as clear as possible. District crews video inspected the This line is on the District's three (3) month cleaning cycle and was cleaned by hydrojeting on November 5, 2008. There h District crews hydrojetted all lines in this portion of the system to ensure they are as clean as possible. District crews vide District crews shut down the lift station to stop the spill. The spill area was vacuumed up and Ocean Blue was called out The previous CCTV inspection of the pipe on 8/8/07 showed minor root intrusion in the line. District crews ran the root cut District crews video inspected the line using the District CCTV equipment and found several sags in the pipe. This line w On 4/26/10, District crews hydrojetted all lines in this portion of the system to ensure they were as clean as possible. Distr The CCTV inspection showed several sags in the PVC pipe. This line will be added to the list of capital improvement pro District crews inspected the pipe using CCTV equipment and found a siphon in the pipe. The siphon was most likely insta

Approximately 50 gallons entered a catch basin inlet before District crews could fully contain the spill. District crews were Upstream of this line is a hot spot and it is cleaned monthly. The entire section was cleaned by District crews on 10/17/20 The pipe was inspected on 7/16/2012 using the District CCTV equipment. The pipe downstream of manhole 12485 is cast District crews cleaned the line again on 2012/11/08 with the District combination truck. Crews then inspected the line usin The CCTV inspection revealed a sag in the main line. This line is scheduled to be repaired as an addition to the District's Crews cleaned the pipe again on 12/10/2012 and inspected the line using the District CCTV equipment. Several sags we Spoke to several residents of apartment complex to determine the exact start time of the overflow. The Garden Grove E

55 gallons of sewage was put back into the city sewer system and 20 gallons was absorbed into the soil. This soil was rer

In the gutter on Garfield

Lost 2000 gals Bolsa Chica Wetlands and recovered 1500 gals all wash water was put back into the City sewer system. Wintersburg Channel

Spill was localized to underground excavation area. No sewage was on street or sidewalk surface.

Storm water flow in the Talbert Channel, the receiving storm water channel, is diverted to an Orange County Sanitation D OCSD WWTP

The spill entered the City's storm drain system that flows into the County of Orange Adams Avenue Storm Water Pump S The spill entered the City's storm drain system that flows into the County of Orange Adams Avenue Storm Water Pump S Fenced and secured City-owned storm water detention basin.

Spill entered catch basin 443CBN001 which flows to the Adams Flood Control Pump Station. At the time of the spill, the 50 gallons Orange County Sanitation District Waste Water Reclamation Plant 50 gallons through 400 feet of storm drain Entire spill and washwater volume was vacuumed and returned to City collection system.

Spill volume (35 gallons) and washwater/cleanup water were vacuumed up and returned to the sanitary sewer collection southwest portion of Huntington Harbor extending over a distance of approximately 750 feet from the public boat launch Spill volume returned to Collection System

Sand area directly adjacent to remote restroom facility.

Spill volume was returned to City sewer collection system.

The five gallons of sewage was absorbed by the dirt containment berm. It was collected and disposed of in the City's grit In low spot in grassy area adjacent to City Manhole No. 5190, approximately 25 feet from manhole. Spill and wash water Sewage and washwater was collected and returned to City sewer collection system.

A majority of the spill was quickly absorbed into the surrounding dirt. A small amount, 200 gallons, overflowed into the We All overflow was captured and placed back into the collections system.

The overflow first flowed onto the street and then to a dirt embankment. Some of the flow breached the dirt area and ente

Recovered spill volume was sent to IEUA's Regional Plant No. 4 for treatment. Spill was contained on site and within an Soil surrounding the underground NRWS pipeline break

Spill was contained within paved and unpaved areas immediately adjacent to the manhole. All recovered spill volume wa Soil surrounding a damaged section of an underground NRWS (Non-Reclaimable Wastewater System) pipeline Spill was fully-contained and cleaned up.

Spill was fully-contained and cleaned up.

## CATCH BASIN

FINAL DESTINATION WAS APPROX. 500' FROM MAN HOLE ALONG CURB & GUTTER NEAR CATCH BASIN

Santa Ana River and unlined drainage channel extending from spill site to Santa Ana River.

Spill percolated into soil.

Spill remained onsite and was cleaned up. No flow off-site. No stormdrain or waterway impact.

Dirt yard at 6686 36th Street and 3708 Edgehill Drive.

Unimproved drainage channel that housing tracts discharge to. The area is remote and mostly on private property (fenced Overflow from manhole flowed down North side of Milky Way Drive to catch basin on the corner of Milky Way Drive and

Area next to lift station is a low area that is designed to capture surface runoff and allows for percolation, no drains from  $\varepsilon$  Pyrite Creek - some urban water runoff ponding in streambed and mostly dry creek bed with limited vegetation, grass and Spilled on golf course property, entered drainage system for golf course that leads to the Santa Ana River

From the south/east side of the intersection of Lakeside Drive & Camino Real, sewage flowed into a storm drain curb-out. Unimproved drainage channel

Root intrusion

The Wastewater Section was first informed of this incident on 12/16/09. The City of Huntington Beach Wastewater Section

Ground water and sand infiltrated through two bottom crack 8 inch sewer line causing a blockage.

The blockage was caused by accumulation of mineral deposits (due to the presence of groundwater )at the joints. This le

Food Service Establishments in the proximity have discharged grease into the City sewer collection system

The blockage was likely caused by debris and rags that had collected at the sewer lateral. Cooking grease may have agreast water bottles, trash and debris was found in the pipeline.

Non-dispersable paper products appeared to be the cause of this blockage.

An electrical component of the sanitary sewer lift station failed without advanced warning. Electrical power within the stati Calcium build-up in line.

Septic/holding tank partially overflowed due to malfunctioning septic/holding tank level sensor.

The blockage was caused by several components. Calcium build-up in sewer line decreased line capacity. FOG compou

Large volume of paper towels recovered from sewer main. Most likely flushed into collection system from adjacent public

IEUA contractor reported that a rock fell on the 18 clay pipe during a cave-in of an excavated construction area.

CSDLAC (County Sanitation Districts of Los Angeles County) technician accidentally dropped glass sample container into The blockage occurred at the 90° bend in the pipeline.

In June 2007, the Chino Hills Parkway pipeline was taken out of service for scheduled construction activities. The flow in

Failed gasket on the sealed manhole lid along the pressurized line which had been damaged due to high pressure in the I

Damage to an NRWS pipeline by a 4-inch utility conduit was discovered during preventative maintenance (CCTV) monitorequipment failure occurred on the primary and backup communication processors.

Centrifuge dewatering activity during normal operation had produced excess foam that surcharged from the NRW sewer | Centrifuge dewatering activity during normal operation had produced excess foam that surcharged from the NRW sewer |

Vandal attempted to steal Air Vacuum Release Valve from force main in a manhole. The damage caused in the attempt ( Vandals dropped debris into manhole blocking flow.

Vactor operator error.

Manhole cover was stolen and debris (bricks and metal flexible conduit) were thrown into manhole, partially blocking flow The SSO occurred during an operational test to verify adequate collection system detention time for planned repairs at th Mechanical plug installed in sewer for new construction of sewer main and building. Most of flow related to a faulty toilet \(\cup \) Lift station primary and back-up level control systems failed. Lift Station pump also partially clogged.

Pump 5 Mechanical Seal assembly failed, causing sewage to leak from pump.

Vandals unbolted manhole cover with security bolts, removed cover and dumped concrete, logs, rocks, carpet, wood and Corrosion on Cement Mortar Lined - Cement Mortar Coated Steel Pipe

Internal pipe corrosion on a short piece of steel pipe over a water main allowed grease to accumulate on the pipe and blo Roots entered manhole joints and blocked sewer main

The City of Huntington Beach Wastewater Section did the clean up and the contaminated debris was vacuumed up and

City Wastewater Crew replaced a two ft. section of line and also lined another six ft to seal all the leaks. Also the complet The City of Huntington Beach Utilities Division Wastewater Section provided site support control and clean up. The City's A temporary by-pass pumping system, complete with SCADA monitoring capabilities, was installed in the manhole at this

In addition to above spill response activities, replaced 2 foot section of sewer pipe likely damaged by construction activitie

The City Environmental Specialist was notified to investigate cause of grease blockage. A CCTV inspection was perform

Manager of facility will be contacted and advised of proper disposal of non-dispersable products.

Sewer lift station electrical repair made and station put back into service. Two vacuum trucks were immediately dispatch Used hydrojetting to clean pipe.

Septic/holding tank level sensor operation is being inspected on a more frequent schedule to ensure proper operation of t Mechanically cleaned portions of the line and videotaped line to ensure all calcium buildup was removed.

Constructed clean out on sewer main to allow more direct access to problem area in the future. Put location on enhanced

Spoiled dirt was hauled off and set aside for proper disposal.

The spill was completely contained and captured before reaching the Cucamonga Creek Flood Control Channel. Response to the manhole overflow was immediate. An earthen berm was immediately constructed to stop flow to the drai

Immediately notified Union Pacific Railroad (UPRR) to cease discharge until the pipeline is repaired. UPRR is the only discharge until the pipeline is repaired. UPRR is the only discharge until the pipeline is repaired. UPRR is the only discharge until the pipeline is repaired.

## REMOVED APPROX. 85 YADS OF SOIL (JCSD WILL BE IMPORTING 85 YARDS OF SOIL)

Flushed unlined drainage channel with 18,000 gallons of potable water and recovered 100% of flow. Removed contaminate Clean-up of spill site included soil removal. Installed bolt-down cover to prevent vandalism. Installed bumper posts to make

Vacuumed sewage and debris from manhole. Cleaned sewers with hydrojetter. Vacuumed up standing water in yard. Disi Flushed drainage channel with 84,000 gallons of potable water and recovered all the flush and remaining wastewater and Placed sand bags at storm drain catch basin. Vacuumed excess water from sewer. Disinfected street, curb and catch bas Repaired and upgraded level control systems, cleared obstruction from pump.

Cleaned up debris in street that came in contact with sewage. Disinfected street with bleach.

Cleaned up and disinfected spill area. Also pumped remaining stormwater that was in containment basin that had become Created containment dams to prevent overflow from reaching the Santa Ana River. Utilized the District's Vactors and the Contained spill by sealing drain pipes. Closed force main valves to immediately stop flow. Flow was diverted to flow equa Once first responders were onsite, secured I/S with traffic control measures for public safety, attempted to contain flow at Reconstructed manhole, removed trees that were the source of the roots in the manhole.

Responded to the down stream ofthe over flow with containment socks. All flow was captured by crews. Jetted line and

Returned to sewer system.

Recovered and sent back into the sewer system Flushed and removed with Vactor truck Recovered and returned to the sewer system. Captured and returned to sewer system. Erea drain Remoed and returned to sewer system.

Recovered overflow and returned to sewer system.

Contained in center gutter and removed with vactor truck and returned to sewer system.

Contained in the street gutter and removed with the Vactor truck and returned to the city sewer system.

Removed wth Vactor truck and returned to sewer system.

Removed with vactor truck and returned to the sewer system.

Immediate proximity of manhole.

spill was completely recovered and returned to sewer system

Contained at curb and gutter.

spill was contained in private property parking lot

The spill traveled approximatley 100' down a street, curb and gutter. Then flowed into a catch basin, connected to an enc Spill entered storm drain system at San Jacinto & Florida Ave.

Sewage surfaced at the sewer cleanout in the middle of a paved driveway

The flow exited the manhole and entered the street which was flooded with stormwater traveling west into the storm drain. The spill pooled up on camp site space #186.

Spill was contained in low spot on space #186

Spill ponded on camp site #207. No standing liquid was found when the sewer system operator arrived on site.

gravel backyard

When staff arrived spill was contained. Back yard drains added to flow in the gutter.

When staff arrived spill was contained. Back yard drains added to flow in the gutter.

Peters Canyon storm channel, staff flush the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons, reclaiming a total of 22,500 gallons from the storm drain system with 6000 gallons from the system with 6000 gallons from the system

| Repaired and secured bypass hose  |
|---|
| All MCSD Forcemains are being replaced project start date 02/12/2007  |
| This portion is in design stage and plans for rehabilitation will occur in 2009   |
|   |
| Contact the City of Westminster paving contractor for inspection of all newly paved areas.  |
| Check the main periodically and cleaned the entire main on 8/26/2013. CCTV line, added Root X and add to reline list if neccessary Used handrods to clear blockage and added root-x to deter roots.   |
| Will CCTV to investigate problem  |
| Wil review CCTV Private Porta Potty, cleaned up street and gutter line.   |
| CCTV to determine plan for correction Rootcut line, CCTV line, no apparent problems at this time.   |
| Hydrojet at 6 month intervals.  |
| Added root deterant and CCTV to determine if repairs are needed.  Line is on a monthly maintenance program, CCTV wil find any problem areas.  Added rootfoam to line, plan on rootfoaming line yearly |

Spill originated from MH#L05-066, Located in front of 1406 S. Fairview St.

Spill originated from MH# 005-038 located at 2720 W. Northwood

Spill originated from manhole ID G03-026 in front of 702 N. Mountain View St.

SSO originated from MH# K03-050 in front of 4319 W. Edinger Ave.

The sewer spill occurred at the intesection of 18th St/Wright Ave. Originated from (M.H. E12-029).

Spill originated from MH# N11-056 at intersection of Cedar St. and Anahurst Place

Spill originated from sewer manhole at intersection of Fairhaven Ave. and Old Grand St. (MH# C11-045)

Spill originated from Manhole infront of 1202 S. Birch St. Manhole I.D. #K09-031

Manhole at intersection of Laird Street and Strawberry Lane

Overflow originated from (MH F10-022) at intersection of 14th St. and Poinsettia St.

The sewer system overflow occurred at the intersection of 15th St and King Ave (M.H. F06-056)

Spill originated from MH# G10-041 at the intersection of Lacy St and Vance PI.

Spill originated from City Manhole # C10-002 located at 2525 N. Main St.

Air release/vacuum relief valve within vault in northbound lane of Temescal Canyon Road

Air release/vacuum relief valve located adjacent to the paved surface within the shoulder area

Air release/vacuum relief valve located along edge of road

12-inch tee located in rough graded Nichols Road

WMWD SARI Truck Dump Station truck dump containment site.

SAWPA performing SARI line cleaning at the Northeast Corner of the Colton Wastewater Treatment Plant. Brine spilt from Maintenance Access Structure (Manhole) IVB - 0730 at 1745 Sampson Avenue, City of Corona.

On the southwest corner of Sampson and Buchanan.

Air Vacuum Valve within a Maintenance Access Structure within the paved portion of Sampson Avenue.

Asphalt paved area adjacent to Schliesman Avenue at SAWPA Maintenance Access Structure (MAS) IVD - 0340.

Schleisman 500 feet East of Archibald.

Air release/vacuum relief valve located adjacent to the paved surface within the should area.

Air release/vacuum relief valve located adjacent to the paved surface with the should area.

Air release/vacuum relief valve located adjacent to the paved surface within the shoulder area.

Riverside County Flood Control Access Road near the SR91 East and I15 South Interchange from Maintenance Access S Within the Arlington Channel access road, approximately 1000 feet East of Pierce Street at SARI Maintenance Access St Air release/vacuum relief valve locate adjacent to the paved surface within the shoulder area.

Air release/vacuum relief valve located along edge of road.

Air release/vacuum relief valve within vault in northbound lane of Temescal Canyon Road.

Leaking saddle from Air /Vac Valve on By-pass line crossing Harrison Street.

MAS IVB -0470 is located on the Riverside County Flood Control District access road adjacent to the Temescal Channel. Spill occurred at the San Bernardino Water Reclamation Plant at the flow meter location for the Mountainview power plan Spill occurred at the intersection of Temescal Canyon Road at Cabot Road in the median on the North side of Cabot Road Leak from a blind flange on a new tee.

Spill is from Air Vac 870 on Temescal Canyon Road.

Spill is from Air Vac AV180 on Coal Road.

Spill occurred on Temescal Canyon Road in the City of Corona between Cabot Road and Fashion Road. The 24-inch Dia Spill is located near SAWPA Brine Line Maintenance Access Structure (MAS) IVE -0092 located on San Bernardino Floor Spill is located on an access road within the Rapid Infiltration and Extraction (RIX) Facility at MAS IVE - 0060.

Spill is located near Maintenance Access Structure (MAS) IVE -0092 located on San Bernardino Flood Control District Proposition Spill is located on the I.E. Colton property on a service lateral near Maintenance Access Structure (MAS) IVE - 0020. SAY Within the Arlington Channel access road, approximately 500 feet East of Pierce Street at Brine Line Maintenance Access Spill is from Air Vacuum and Release Valve on Baker Street. Baker Street is an upaved roadway in Lake Elsinore.

Spill is located on an access road with the Rapid Infiltration and Extraction (RIX) Facility at Maintenance Access Structure

Spill is located on the Arlington Channel access road. 500 FT NE of intersection of Arlington Channel/Pierce Street.

Spill is from Air Vacuum and Release Valve AV - 900.

Air release/vacuum relief valve within vault in northbound shoulder of Temescal Canyon Road.

Air release / vacuum relief vavle located along edge of paved road.

Air release / vacuum relief valve located along edge of paved road.

Spill is located along Sampson Avenue, approximately 1,000 feet Northeast of the intersection of Sampson Avenue and N Spill located on Buchanan Street, 100 feet north of Magnolia Avenue.

1 om hose connected to the debris bin. Structure IVB - 0540. ructure (MAS) IVB - 850. Spill occurred on access road and adja ıt. d. The spill flow came from the 24 PVC ameter Brine Line is located within the ne d Control District Property adjacent to th operty adjacent to the Santa Ana River a WPA constructed two drying beds at this s Structure (MAS) IVB - 850. ) (MAS) IVE - 0050.

Air release/vacuum relief valve

Air release/vacuum relief valve

12-inch tee extended to ground surface

From Wastehauler tanker truck off loading at Dump Station Discharge Point .

Debris removed from the SARI was placed in a dewatering debris bin. The spill occurred when the hose was disconnecte

Spill was from an air vacuum release valve.

Spill was fully contained within the Maintenance Access Structure. Spill did not discharge from the Maintenance Access Spill was from equipment while cleaning MAS IVD - 0340.

Spill was from a Vactor Truck used for removing solids from the brine line.

Air release/vacuum relief valve.

Air release/vacuum reief vavle.

Air release/Vacuum relief valve.

Air release/vacuum relief valve

Air release/vacuum relief valve.

Air Vac Valve

Leaking saddle from air/vac valve on by-pass line.

Spill occurred from flow by-pass system discharging to MAS IVB - 0470

Flow Meter for the Mountainview Power Plant

24 PVC pipe is buried about 15 feet to top of pipe.

Leak from a blind flange on a new tee installed on 16-inch brine line. Tee was installed on Brine Line to allow access to the Spill is from an Air Vacuum and Air Release valve.

Spill is from an Air Vacuum and Air Release Valve.

24 diameter PVC pipe is buried about 9 feet to top of pipe.

Spill is from a discharge hose connected to a dewatering pump. The pump was connected to a blow-off valve at MAS IVI

Spill is from a blow-off valve at MAS IVE - 0092.

Spill is from a valved 4 - inch tee on E.I Colton's Brine Line service lateral.

Spill is from Air Vacuum and Air Release Valve on Baker Street.

Air Vacuum and Release Valve AV - 900.

Spill is from an Air Vacuum and Air Release Valve within a vault.

Spill is from an Air Vacuum and Air Release Valve.

Spill is from air release / vacuum relief valve.

Other (specify below)

The cause for this SSO was attributed to debris (general) introduced into the sewer manhole.

Evidence of plastic debris and a piece of asphalt approximately (5)- inches diameter were identified as causes of the sew

Air release/vacuum relief valve failure

Air/vac valve briefly spit brine upon increase in flow rate through pipe.

Air/vac valve briefly spit brine upon increase in flow through pipe.

Threaded cap mounted to blind flange on tee removed to obtain water quality sample. Line was nearly surcharged resultir Automatic valve closure reason unknown, and slow truck operator response.

An obstruction occured when a hard hat became lodged within the pipeline possibly due to scaling within the pipeline. Th Air Vacuum valve stuck open.

Air Vacuum valve stuck open.

Spill was caused by equpiment failure while cleaning MAS IVD - 0340.

Spill was caused by a mechanical check valve that did not seal due to the vactor truck debris tank being full.

Air/Vac briefly spit brine upon increase flow rate through pipe.

Air/vac valve briefly spit upon increase in flow rate through pipe.

Air/Vac briefly spit brine upon increase flow rate through pipe.

Spill was caused by reduced capacity in the line due to scale build-up in the invert of the pipe and an increase in discharg Flow restriction in pipeline due to scale build-up within the pipe.

Air/Vac valve briefly spit brine upon increase in flow rate through pipe.

Air/vac valve briefly spit brine upon increase in flow rate through pipe.

Air/vac valve briefly spit brine upon increase in flow rate through pipe.

Air / Vac valved failed to close.

Leaking saddle for Air/Vac Valve.

The SSO was caused because the bypass system was activated and the MAS lid at the receiving MAS was not removed. The operator replacing the 8-inch magnetic meter for mountainview power plant did not fully drain the line prior to replacing linitial investigation is a failure at the pipe joint due to a gasket displacement. A forensic engineer will examine the pipe. Defective gasket between blind flange and tee.

Air Vacuum and Air Release valve failed to seal during restart of Brine Line.

Air Vacuum and Air Release valve failed to seal.

SAWPA Contractor hit the line while excavating a 6 foot wide by 9 foot long. Test Pit. The purpose of the test pit is to de During set-up and start-up of a dewatering pump at MAS - 4E-0092, a discharge hose fitting failed and brine was discharge. A gasket at MAS IVE - 60was damaged and did not provide a water-tight seal.

Operator failed to close blow-off valve upon completion of line cleaning activity and returning the brine line back to servic Operator failed to close blow-off valve upon completion of line cleaning activitie and returning the brine line back to service Flow restriction in pipeline due to scale build-up within the pipe.

Air Vacuum and Air Release valve failed to seal.

Manhole concrete riser piece was damaged at MAS IVE - 50 and did not provide a water-tight seal.

Increased discharge exceeded hydraulic capacity of pipeline.

During maintenance of the Air Vacuum and Air Release valve the shut-off valve was not completed closed. As the valve Air Vacuum and Air Release valve spilled prior to sealing.

Air Vacuum and Air Release Valve failed to seal.

Air vacuum and air relief valve failed to seal.

Obstruction in pipe.

Valve left open after a blind flange was put in place, this caused an SSO after the upstream discharger began discharging

Repair of manhole to allow for improved flow transition is planned to mitigate potential of SSO in the future.

Defect in portion of pipe discovered. Pipe is being scheduled for repair. Smart Cover sewer flow level monitor placed at staff flushed and vaccuumed affected separate storm drainpipe.

The spill estimated volume was revised due to the fact that it was not a continuos flow. This segment of pipe has been a

This segement of pipe was videod (CCTV) to determine the cause of the overflow. It was determined from the video, van The staff contained and cleaned the affected area. The area has been inspected using CCTV, and cleaned to determine a

Analytical reports once received will be forwarded to the Regional Board.

All of the wet soil was shoveled back into the debris container.

Sand bags were placed at the enterance of the storm drain to prevent additional brine from entering the storm drain. Stored Spil was contained in a valve box adjacent to the Air Vacuum Valve. The brine was recovered and returned to the pipelir Spill was fully contained within the Maintenance Access Structure. The brine from the spill was returned back to the system.

The material was contained and completely recovered. The area was washed down, disinfected and the wash water was Removed and disposed of wet soil around air vac valve.

Removed and disposed of wet soil around air vac valve.

Removed and disposed of wet soil around air vac valve.

Standing brine on the soil was collected with a vactor truck and returned to the brine line. Wetted soil was removed and

A containment pig was placed in the flow line of the curb to contain the spill. By-pass system was shutdown. The saddle

Initial spill response activities on October 18th include 6 vacuum tanker trucks and 4 vactor trucks to the site to recover b

Upstream dischargers were immediately notified to shutdown. Upon verification of shutdown the nearest upstream mainl Immediately shut off pump. Removed saturated soil and disposed of at an approved disposal facility.

Installed new gasket and cover and MAS Location. Removed saturated soil and disposed of at an approved disposal faci Closed valve. Removed saturated soil and disposed of at an approved disposal facility.

Closed valve. Removed saturated soil and disposed of at an approved disposal facility.

Installed new watertight concrete ring, frame, cover and gasket at MAS 50. Removed saturated soil and disposed of at a Reduced discharge rate. Removed saturated soil and disposed of at an approved disposal facility.

Removed and disposed of wet soil around air vac valve.

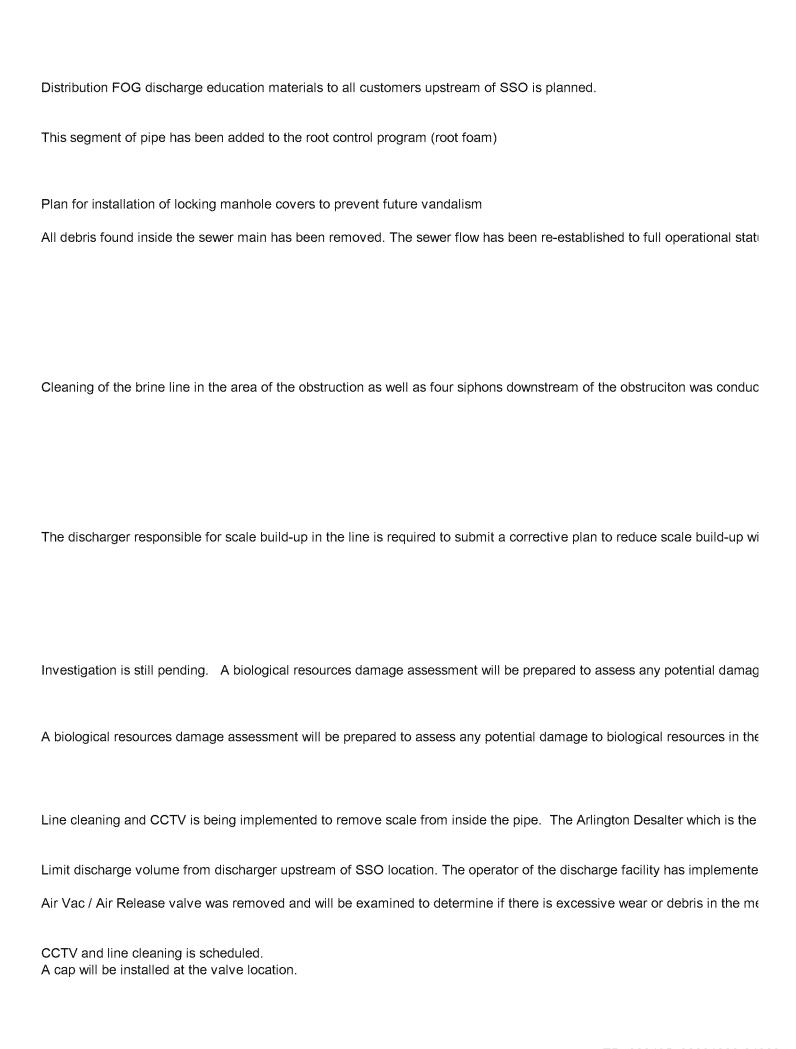

Remove saturated soil from spill area and replace with clean soil.

Closed Air Vacuum Valve. Removed and disposed of wetted soil around air vac valve.

Closed air vac valve. Spill occured on paved portion of Temescal Canyon Road and shoulder of road and evaporated. V SSO had stopped prior to operator arriving. Washed down street and recover washdown water. Mobilized CCTV truck a Upstream discharger was told to stop discharging immediately. Catch basin was blocked using a rubber mat to minimize

Root intrusion

While excavating a 16 DI sewer, a 3/4 nipple attached to the old sewer bypass blew out. Old drain line plug on sewer bypass equipment
As part of a sewer pump station rehab project, cam lock on by-pass came loose

On call City employee was notified by a private plumber who was snaking a business lateral City employee arrived before

Tree Roots and Rag

The 8 inch sewer line on Fern Ave was obstructed by several concrete rocks, each approximately 6 x 3 in size (see pict.

Utility work crew drilled through line

D152 Pump controller failed. Replaced with Hydroranger.

M/H was struck by a backhoe. The M/H barrel was seperated approximately 2' below grade, rocks & debris when inside the

FOG and pipe problem (channel not cut all the way for lateral).

FOG, rags and debris

Stick was found across the flow cause build-up and causing blockage.

General debris and FOG

General Debris; manhole lid removed allowing sand to enter sewer; possible vandalism.

Vehicle struck lift station facility damaging piping.

Air vac stuck open.

Construction crew hit pipe during excuvation. Site was correctly pre-marked.

Debris, heavy grease and rags were observed when blockage was broken. However, due to this sewer line, and lines trib The spill was caused by an 8 screw plug left in a sewer line from a nearby new development by D.R. Horton that was instructed use to rainstorm took pumps offline, brine from desalters drained back into wet well causing it to overflow At the time the blockage was cleared, there was some grease observed. Records showed that this sewer line had been continuous The manhole had rocks, sticks, debris and grease in it that blocked the flow of the main line and filled up customers later. Lift Station operator arrived on scene to find Pump No. 3 discharge line spraying sewage around immediate area. Upon in The spill wad due to a mechanical failure. The airvac at the pump station became stuck and the float came unscrewed cause was not able to be identified once blockage was broken. There was no indication that grease was a major cause, a

A construction cone and several pieces of plywood were removed from the manhole.

Lift station pump failure

There were two causes, one was root intrusion, the other was a Verizon fiber optic line had drilled through and placed a p

Wetted soil around the Air Vacuum and Release valve was removed. Brine in spill containment area was pick-up and ret

Contractor is on duty at station 24-7 to maintain sewer by-pass during construction responding imediately, valve was shut

Spill was vacumed up and deposited in downstream manhole

City staff discovered the spill approximately two minutes after it occurred and quickly mobilized a response crew. Staff ut Snaked clean-out line.

Public Works Maintenance Staff received a report of a sewer spill at 7:05 pm, March 4, 2010. Staff responded immediate At 13:40 on 3/5/2010, City Code Compliance noted a sewage smell at 10500 Lowden St and called Public Works. Public

Big Bear Shores maintenance foreman Dave Calhoon had plowing snow all morning and making routine checks of the re-

Notified of spill in progress at 9:20 PM, arrived on scene at 9:45 PM. Set up containment, cleared blockage, cleaned up a Checked station, found pumps not running. Ran in hand, pumped wetwell, found failed controller. replaced controller. T Repaired M/H 10-14-2008

Broke blockage and returned normal flow to sewer. Area absorb spill, area was raked clean and lime applied. Follow-up clean-up to affected area including apartment building. Added street to the 90-day hot spot.

Will include manholes to trouble sections for increase check and routine clean-up. Spill percolated into the ground and an

The top layer of soil was removed.

193,623 percolated into the field that was not recovered.

The blockage was broken by EMWD crews. Vaccum trucks were called in and the storm drain was flushed where the SS Collection crews arrived and there was no further seepage from manhole. They found a damp spot near manhole and a composition of the power damp spot near manhole and a composition of the power controlled gates when the overflow Original call came into EMWD at 4:58 pm and a water leak was reported. At 5:40 pm EMWD Collections Crew was called Call came in as a customer lateral blockage. Upon investigation it was found that manhole was blocked with debris. Crew Upon arrival, lift station operator immediately shut off the pump, and then called the collections and vactor crews to begin Upon arriving to the scene, the first responder immediately shut down the forcemain valve which immediately stopped the CCTV of the line was conducted on Tuesday, December 11th and root instrusion into the sewer line was determined to be Once the blockage was cleared, it took some time to track where the storm drain lead to. Crews had to utilize dye to track

A total of 192,000 gallons of water was recovered. This includes 70,000 gallons of wash water.

Atempted to contain spill. Called for additional equipment and man power. Blockage was relieved and area was cleaned i

Sewer Spill was contained within the construction trench

Spill volume was contained within the excuvation trench

Spill was contained along the curb and gutter portion of the street.

Spill percolated into the soil adjacent to the manhole. Contaminated soil was removed by contractor. District staff disinfec

Spill was contained within the dirt roadside of McVicar Strret. Spill volume liquid was captured and returned to the sewer spill seeped from manhole (5 gallons) and ran dow gutter to strom drain culvert. Spill was contained, captured and dispose Spill was containe, captured and returned to the sewer.

The small amount of sewage spilled was collected by the plumber and disposed of.

Un paved surface of a park area.

Spill perk into soft soil in field. The District crews during the clean up phase removed any debris and scheduled soil to be Spill volume was contained within the easement, was captured and returned to the sewer collection system.

Temescal Creek

The combination of river water, sewage and rain infiltration flowed into Lake Elsinore.

Sewage was contained and vacuumed up utilizing the District's combination unit and returned to the sewer system.

Very minor spill of 5 gallons, street was wet or damp

Gunderson Pond Wetlands area

Gunderson Pond wetlands area

The spill destination was two fold. 52,825 gallons entered the surface water and 15,000 gallons entered a field.

exited the storm drain at the botom of a valley behind the housing development, the area is overgrown with native shrubt stayed in the storm drail catch basin

spill reached the gutter but did not run down the gutter.

vacant field

On site in a low dirt area.

Customer yard

Retention basin adjacent to Golf Course fairway.

San Diego Creek

Vacummed and returned to the sewer

Spill was contained storm water channel protected by sand bags

Returned to sewer

Returned to sewer

Returned to sewer

Street gutter

Storm water catch basin

Heavy rains in area, Santa Ana River at flod stage. River flow in excess of 8,000 feet cube per second

Returned overflow to sewer

Earthen Dam down stream of storm outlet captured all of spill. Spill was them returned to the sewer with portable pumps.

All recovered

Returned all of spill to the sewer

H&H General Contractor's excuvation crews hit force main during the trench excuvation for a new sewer main.

Construction Activity - Contactor's crews failed to support the force main during the excuvation and it separated at a joint An airvac device used to release entrapped air from a liftstation failed due to debris releasing the seweage.

By-pass pumping station set up by contractor failed to keep up with District lift station flow.

Rocks and debris (possible construction debris) collecting rags and grease.

Spill came from a force main surge tank acess port. On 7/29/2008 the area experienced a 5.8 magnitude earth quake. Study by stream of the SSO on Odysssey St. the developer's contactor had left rope in manhole which collected rags causing the stream of the SSO on Odysssey St. the developer's contactor had left rope in manhole which collected rags causing the stream of the SSO on Odysssey St. the developer's contactor had left rope in manhole which collected rags causing the stream of the SSO on Odysssey St. the developer's contactor had left rope in manhole which collected rags causing the stream of the SSO on Odysssey St. the developer's contactor had left rope in manhole which collected rags causing the stream of the st

Contractor damaged lateral during installation of new collection line in street.

Abandon force main was leaking at a pipe joint.

Down stream lif station pumps and become blocked with construction debris, plumber's rubber plug and pieces of pvc pip Lift station force PVC main pipe cracked at a bell end and began to seep sewage during pmping cycles.

A power control fuse blew shutting down the station resulling in the spill

This liftstation recieves backwash flows from the District's Backbasin Treatment Facility. During a filter media check exce

Surcharge condition cause by District staff clearing / dewatering spent backwash basin

Strom inflow to collection system overwhelmed the system and it spilled at this location.

The spill was caused by a power outage due to downed power lines.

This was during a strom event which resulted in a large amount of inflow and the station could not keep up with this inflow Strom event and surcharge of sewer system

rebar was found in the manhole and over time grease and rags gathered on the rebar and caused a blockage. Sand and rock

Plastic bottles, pine cones and other trach was found in the main, a nearby cleanout had similar debris removed. an air release line on a sewer force amin broke prior to the isolation valve. turned the liftstation off to stopp the flow. there was an electrical failure in the control section

Control fuse blown not allowing the pumps to start or send high leval alarm. A pump failure alarm did activate to notify the

The liftstation only services the Back Basin Water Treatment Plant, the waste discharge valve from the waste tank failed

Asphalt was found in the manhole that caused the blockage.

Plugged Grease Interceptor.

New construction debris left in man hole

House hold grease, no industrial

Heavy rain, fire department opened sanitary sewer man holes to releive street flooding. Fire department has been advise

| Open Channel Storm way   |
|--|
|  |
| All spill volume was recovered and returned to sewer system at pump station.   |
| Spill contained to unpaved pit area within a surrounding dirt road area under construction for a new sewer by OCSD contr   |
| Most of the spill was vacuumed up, however some of the spill stayed in the storm drain.  |
| Final spill destination was inside the private property owner's bathtub-shower which in turn was inside the private property Spill soaked in ground at dirt trench where contractor was working and hit the spare force main. Soil was removed to applicatch basin |

Contractor provided inadequate bracing during construction. End plug of a capped pipe came un-done Spill occurred while cleaning wetwell because influent sewer shutoff gate to pump station wetwell was closed without prop Spill due to roots growing into the OCSD local sewer. Plumbers working on bathroom facility in area. Contractor working for OCSD to install a new gravity sewer caused force main line break by hitting the top of the force main line break by hitting the break by hitting Roots were in main line and not pushed in from the house connection lateral Roots and debris Contractor working at pump station drove a 315B CAT Excavator over the 4-inch force main causing a shear crack on the calcium build up on rags within the 8 inch VCP line Roots were also seen. Unknown Contstruction by-pass plug Rags plugged the flow through diversion. Pressure testing on new force main. Failure of force main coupling during pressure test. Air relief valve; ball valves (2) open Intermittent seepage. A broken 6 inch irrigation water line. The water from the 6 inch line flooded into the trench and flowed into the 10 inch sev Pine needles caused blockage that lead to grease getting trapped in line.

ED\_006495\_00001080-25024

Contained all spilled amount and returned at least 90% back to sewer collection system.

Sewage dried up on the street/curb and gutter. OCSD crew tv'd line and pulled out 1.5 buckets of roots.

Wash down and clean-up by OCSD crew. OCSD set-up containment and vactored up spill and returned to sewer system OCSD ran line in street and all is ok, Final clean-up was finished at 1410pm.

Roots were cut on main line segment on Oct 20, 2008. Will be Vapor rooted at a later date.

Jet line segment going uphill from manhole SUN0430-0435. May still have minor root in it. Also confined space clean to

Arrived onsite at 08:30 and drove around the area to assess situation. Set containment however, there were four 30-foot Arrived on site, set up traffic control, containment and notified Control to call secondary Ernie Savedra & David Andrade Arrived and set up containment & notified Control that an OCSD manhole was overflowing & requested additional assista

Relieved stoppage and started clean-up; wash-down and vaccuming up. Ran line segment again and one more down-str Crew arrived on-site and found line surcharging. Upon further investigation; surcharging was caused by construction on N Contractor notified OCSD of SSO on June 11, 2011 at 1:00am. However, they dialed the wrong number and left a messa Coupling failed during pressure testing of a new connection to an existing force main. Water/wastewater shot into the air. Set containment at gutter. Took pictures. Called Control Center for vactor truck to be dispatched. Vactor was set up at the Arrived on site and set up spill containment. There was no flowing sewage when I arrived, just a wet spot but there was expected with Bill Gilbert and others, closed both ball valves to stop flow. Opened main valve under ARV only and air is Manned pump station until automatic control was restored

Manned pump station until automatic control was restoraged

Fire Dept set containment of dirt. Ocsd crew put down rubber mat and called for back-up help. Located where sewer net Upon arrival, found intermittent sewage bubbling out of the 24-inch manhole cover pry holes. Set containment, inspected

Will review preventative maintenance activities

Provide redundancy to WWRF computer monitoring system

FOG outreach to residences and run the line segments in the area to make sure the line is free of anymore grease. FOG residential outreach. Run the line segments in the area to make sure the line is free of anymore grease. CCTV - Put on trouble spot list.

CCTV line segments all the way to Redhill Ave. Also may want to vapor root those line segments. CCTV completed on '

CCTV line segment and check for roots or offset joints

Root cut entire area.

CCTV and flush line segment downstream

FOG reactive notification to surrounding spill area. See FOG attachment.

Perform closed circuit television. Cleaned sewer lines and removed roots. FOG outreach implemented to surrounding he OCSD cleaned the sewer line all the way to Newport boulevard where it merges with a larger size line. CCTV showed no Line cleaning, root cut, and CCTV line segments.

CCTV and root removal

Use pole camera to see if there are any more obstructions. Sent out FOG outreach education materials.

None

Revision to Spill Prevention and Countermeasure Control Plan. Retraining of SPCC to all Kiewit staff and importance of t

Check other air vac valves.

Refer to Sequence of Events for Lido Pump Station Failure attachment.

Refer to Sequence of Events for Lido Pump Station Failure attachment.

None taken.

A CCTV inspection of the line was done. Root cutting of this pipe segment as well as two upstream pipe segments were:

Work with contractors to ensure future line-breaks will not sur-charge sewer lines.

Agency is attempting to identify where and how pine needles enters sewer system.

Removed debris from manhole.

Removed debris from manhole

Repair manhole rings. Install caution poles.

Bubbler Failurte at Lift Station

Grease buildup on roots caused blockage

Infiltration of storm water washed sand and debris from abandoned sewer main into downstream manhole

Excess flow in storm channel erroded away, undermining the sewer main and manhole

At this time, the cause of the blockage is believed to be roots and grease, but this section of sewer main is scheduled for

Grease trap became clogged with debris and caused food preparation effluent to back up onto Main Culinary loading docl

inmate tooth brush

line plugged causing flow to dichatge out of ventpipe

Ditch failure, a reclaimed water line had recently been installed below the sewer line.

During the construction of a new sewer line a piece of shoring fell and broke a 10 inch sewer line.

Rocks were found in the line.

Grease Rags and Debris were removed from the downstream manhole when the blockage was cleared. Grease Rags and Debris were removed from the downstream manhole when the blockage was cleared Grease Rags and Debris were removed from the downstream manhole when the blockage was cleared Grease Rags and Debris were removed from the downstream manhole when the blockage was cleared Rags and grease in private lateral. 17 feet of sag in lower lateral.

Large rock in syphon

Stick of lumber in sewer main.

Spill was the result of a contractor failing to remove a test plug after making a connection to an existing sewerline It is believed that a septic hauler drained his truck into the sewer blocking the main with plastic bags and hair resulting in Grease and Roots

Blockage: rocks and debris. Apparently the sewer main was damaged then repaired during recent intallation of a Verizon

The Ontario sewer main is connected to the IEUA pipe at point that is too low to allow sewage to fall in ; therefore, greas

A rod wedged in the main collected rags and grease causing blockage. Rags and grease

Large rocks, rags, and debris

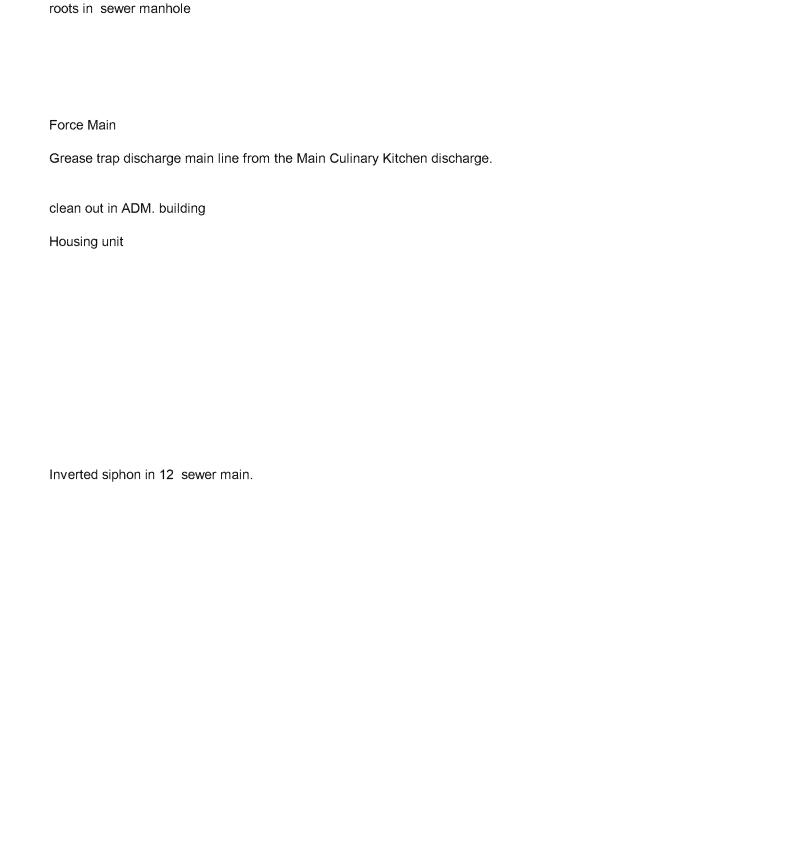

Grease and roots

Construction debris from newly installed private 8-inch sewer main tie-in with new manhole structure entered our sewer m

Upgrading alarm systems at District Lift Stations; Solids (grease) sucked up with Aquatech truck, area cleaned of all debi

The crews opened the manhole and began vacuuming the sewage to prevent further discharge while other crews jet rodd Jeremy Costello (District Employee) contacted me at 9:20am about a report from Robert Estrada (Construction Inspector) District Staff found sewage discharging from manhole M20-28 at a rate of approximately 50gpm. This sewage went a sho

Kitchen cooking effluent spill was contained and stopped after an estimated 100 gallons entered the storm drain system.

Contained spill and restored sewer flow contained below building

The spill was mis diagnosed as a water leak the night before at the time it was estimated at 2 GPM by morning it was flow Flow was immediately diverted to another line until the completion of repair was made.

The sewer line was by-passed and televised, there was no evidence as to where the rocks and debris came from.

This pipe segment is an inverted siphon, the up and downstream piping was televised, no defects were observed.

Cleaned blockage, recovered spill from storm drain, cleaned and sanitized area. Spill had entered storm drain at 1005 N

City crews contained spill and protected storm drain catch basin. Blockage was released. Crews collected all spilled sews

Cleaned, contained and returned portion of spill to sanitary sewer. Residents had clean-up crews clean and collect remair Private company cleaned up basement and returned spill to sanitary sewer Ongoing investigation.

Crews arrived and contained spill in the gutter. Blockage was removed, flow restored, and all spilled material was collect

Will televise and investigate futher. Source control staff will investigate upstream sources of FOG.

Repaired lateral; replaced section of pipe.

Contained spill within easement and properties. Called Servpro for cleanup and disinfection within easement. Investigation is ongoing

Apartment owners will have a restoration company repair damages and submit claim to City for reimbursement.

New sewer system filled with gravel and construction debris.

Spill was due to a valve closed when it was thought to be open. It occured during a wetwell cleaning event.

Force main failure.

Private contractor's high-line hose broke/disconnected.

Malfunction of a sewer meter was restricting flow, eventually causing sewage to overflow out of manhole.

CCTV investigated the line segment of the SSO. There was no indication of any root intrusion or any other cause of the S

Mechanical failure, one of 4 door locks to rear door hatch failed to lock.

Root inflitration through sewer main end stub @ manhole # 5538 (start of line), roots inflitraded manhole causing blockag Electrical malfunction in the pump station

Root intrusion in to sewer manhole # 3952, roots blocked sewer lateral that taps in to manhole causing back up of lateral A siphon and gravel bags were not removed from the private contractor/or developer causing the blockage.

Toilet Paper / Tee Shirt

SSO is unknown at this time. CCTV the line segment and did not find any obstruction that would cause a blockage. Possi Cap was in appropriately removed from cleanout box

it appears to be a combination of some grease and more debris-rags that have caused the SSO. Plug was broken earlier that day. Plumber did not clean up area left a mess in property and curb line.

## ETWD'S FREEWAY SEWAGE PUMP STATION. THE OPERATOR ACCIDENTALLY LEFT THE PUMP SWITCHES ( The failure occured a pump station during a wetwell cleaning event. Spill occured at sewer pump station. Failure occoured on section of 12 inch pipeline. Between the 2nd and 3th manhole from the start of sewer main segment in the parking lot of shopping center. McDonald's Equipment Roots in public Manhole, start of Sewer Main Line. Private lateral conected directly into public manhole. Electrical malfunction in the pump station In the sewer manhole Crews were performing reg. maintenance about 1/4 mile around the area. When refilling the Combo. truck with water, the Forced Main Pump station due to Electrical component failure private lower lateral

Loss of signal to pumps from leveling system Signal from leveling system to pumps lost Air relief valve

## BANDEL STORM DRAIN STATION DIVERTED BACK INTO SEWER STATION.

Sanitary Sewer Main

Evaporation to atmosphere and road surface: 10 gallons

Dammed in Parking Area of complex and returned to system.

Infiltrated into soil in back yard of 368 Serpentine Drive, Del Mar, CA 92014

Absorbed in surface

SSO fully contained: sanitary sewer water (300 gals.), irrigation/run-off (50 gals.), and wash waters (150 gals.), all capture 264 gallons reached the Pacific Ocean, since it was a high tide and ocean waters were right up to Ahmanson Bluff Preser

Sewer main, after all surfaces (street and unpaved surface, storm drains) were cleared and cleaned.

All spilled sanitary sewer water and clean-up water was recovered and returned to City's sanitary sewer system.

The limited amount of estimated 50 gallons of spill fluid spead on and partially absorbed into hardscaped pavement and pacific Ocean

Spill was fully recovered and returned to City of Del Mar Sanitary Sewer System.

Approximately 50 gallons of sewer spill was recovered and sent to sewer system. Approximately 50 gallons evaporated fr City of Del Mar sanitary sewer system.

The 120 gallon liquid absorbed in the concrete ribbon drain in the center down the alley and ran south in NCTD's concrete Outfall DH-A7-20 from the Del Mar storm water system on the Beach at the Pacific Ocean.

Canyon area between Zapo ST and Seaview Avenue

Sewage final destination was an earthen sump where it percolated into soil. (see attach photo) Final destination was an unpaved area locted at 3049 Camino Del Rancho Street.

Failure of air relief valve, time unknown Failure of air relief valve restaurant plumbing cracked, leaked into the bay RELIEF VALVE BROKE Roots from a private lateral Toilet paper coming from sewer lateral hooked up to clean out. City main sewer line was clear. Roots and Cleaning Rags. Roots and rag in sewer main between manhole Del Mar GIS map B6-06 to B6-16 Roots in main between MH B6-16 to B6-04 c.o. Root intrusion between the concrete rings that make up the manhole inspection structure found their way into the downstr Growth of roots (root ball) within the main had blocked evacuation of sewer down the pipeline, causing build up of sewer v Cleaning rags This particular clean-out is shallow, at least one service line is tied into it (this will be improved through FY2011 Water an Roots build up in the line, with build up of paper based materials around them. Debris, cleaning rags and hygiene products found in sanitary sewer main between MH B814, and MH B815. Rags and plant roots clogged main sewer line, down from B5-05 c.o. Plant roots that were released into the Sanitary Sewer System, due to Herbicide treatment since 7/13/2011. Roots and paper in the sewer main between MH B10-06 and MH B10-12, lead to SSO at B10-05 c.o. Root intrusion into the manhole, at the bottom of trough, that prevented/slowed down the sewer water to continue to flow Root intrusion and Pipe Structural problem A rounded 4- to 5-inch diameter cobblestone was found in the pipe. It is likely that the object was placed into the 6-inch s Roots originated from various lateral. Roots in adjacent laterals combined to partially block public sewer main.
